NEW YORK STATE LOCATION MULTIPLIERS

The purpose of location multipliers is to accurately reflect varying costs of construction throughout the state. It is supplement to the base cost tables which are calculated at a Syracuse base value. Therefore, the number corresponding to each county in this table is a percentage reflection of building costs in that particular county relative to Syracuse (Onondaga County).

Values exceeding 1.00 would indicate that the subject location has construction costs which are somewhat higher than Syracuse. Correspondingly, values which are less than 1.00 would indicate subject areas which have lower construction costs than the Syracuse base costs.

This percentage is used to factor the base costs. The number produced will reflect the normal costs in the subject county.

County Code	County Name	Location Multiplier
01	Albany	1.03
02	Allegany	1.01
03	Broome	1.00
04	Cattaraugus	1.03
05	Cayuga	1.00
