Distribution of Farm and Forest Parcels by Property Class, 1993 Assessment Rolls

The New York State Division of Equalization and Assessment (SDEA) provides a set of real property use codes which are used by assessors to describe the use of all parcels listed on assessment rolls. The SDEA classification system is uniformly applied to all New York State municipalities outside New York City. A description of each of the specific codes used in this report is provided in an appendix.

Individual codes, which are three-digit, are grouped into nine general categories, referred to as broad use categories. Broad use categories are composed of divisions, indicated by the second digit, and subdivisions (where necessary), indicated by a third digit. The nine categories are:

<u>Broad Use Category</u>	<u>Description</u>	<u>Broad Use Category</u>	<u>Description</u>
100	Agricultural	600	Community Services
200	Residential	700	Industrial
300	Vacant Land	800	Public Services
400	Commercial	900	Wild, Forested, Conservation Lands & Public Parks
500	Recreational & Entertainment		

This report shows the number and total acreage contained within each of the twenty-four agricultural and twenty forestland property classification codes which were valid for the 1993 assessment rolls. Additionally, property class code 321 (Abandoned Agricultural Land) was included in the agricultural totals, and property class code 323 (Other Rural Vacant Lands) was included in the forestland totals. These categories were included because it was felt that there was a fair degree of subjectivity involved in assessor determinations of the appropriate use class for lands that are not actively used. While one assessor might classify such parcels as general agricultural or forestland property in recognition of their potential or non-active use in these pursuits, and thus assign them a 100 or 900 property class code, another assessor might well assign similar parcels 321 or 323 property class codes.

Most municipalities provide very good information on the dimensions or acreage of the agricultural and forestland parcels in their jurisdiction. More than 98 percent of the parcels in this report contained such information. However, it should be noted that the acreage totals in Suffolk County are understated because the towns of Babylon (165 agricultural and forestland parcels) and Huntington (257 agricultural and forestland parcels) failed to report lot sizes for these parcels.

While this report summarizes the data at the county level, summaries can also be prepared for specific towns on a limited, special-request basis.
