

Instructions

Use this form if you use kero-jet fuel to operate any aircraft that had a flight or a leg of a flight taking off from New York State.

Column A - Enter the aircraft type for each type of aircraft that had a flight or a leg of a flight taking off from New York State.

Column B - For each type of aircraft listed in column A, enter the number of flights or legs of flights taking off from New York State and landing outside the state.

Column C - For each type of aircraft listed in column A, enter the number of gallons per departure from the *New York State Fuel Consumption Per Departure* table below. The gallons per departure gives the average fuel consumed in taxiing from the loading gate to the takeoff area and in the takeoff.

For types of aircraft not listed in the table below, you should submit a separate schedule to the Tax Department for each type of aircraft giving the following information:

1. Description of aircraft - Indicate the manufacturer, model number and type (cargo or passenger). If the type is cargo, indicate the maximum carrying capacity; if passenger, indicate the seating capacity.
2. Construction - wide body/narrow body.
3. Number and type of engines (jet, propeller, etc.).
4. Systemwide average taxi-out time (from the start of the engine at the loading gate to the release of the brake at takeoff, including waiting time).
5. Major airports of departure in New York State.
6. Taxi-out time for each airport listed in Item 5.
7. Fuel consumption per minute during taxi-out time as defined in Item 4.
8. Fuel consumed from the time the brake is released to the first four minutes of flight.
9. Fuel consumed from the time the brake is released to first five minutes of flight.
10. Airports (cities) serviced by aircraft departing from New York State airports.

Send the information to:

NYS Tax Department
TTTB/FACCTS Fuels Audit
Building 8-855
W A Harriman Campus
Albany NY 12227-0250

Column D - Multiply the column B amount by the column C amount.

Column E - Enter the total gallons of kero-jet fuel consumed on flights or legs of flights taking off from New York State and landing within New York State.

Column F - Add the column D amount and the column E amount.

Line 1 - Add the column F amounts and enter the total.

Line 2 - Enter the total gallons of kero-jet fuel purchased that included the petroleum business tax (i.e., total gallons on which the petroleum business tax has been paid).

Line 3 - Subtract line 2 from line 1 and enter the result. Enter any negative amount in brackets.

Transfer the total gallons on line 3 to line 15 of either Form PT-104, for monthly filers or Form PT-202, for quarterly filers.
