Computer to Plate Image and Proofing System
IFB #07-34
Questions

#	Question	Answer
1	"Offerer Affirmation of Understanding of, and Compliance with, Procurement Lobbying Guidelines": I did not submit this by Dec. 12th; can I submit with my Bid?	The "Offerer Affirmation of Understanding of, and Compliance with, Procurement Lobbying Guidelines" can be submitted late; however the Form should be submitted as soon as possible.
2	Your IFB request for a Computer to Plate Image and Proofing System: "The CTP device must be semi-automatic with an online plate processor and plate stacker..." It does not mention a Plate processor and a stacker. Are they part of the Bid?	As the specification indicates, the online processor and plate stacker are part of the Bid.
3	"Must support PDF 1.3, postscript 3, TIFF 6.0, JPEG, CALS/G4, HP RTL, and HP1GL/2, and be capable of printing media up to a maximum width of 40" to 46" and the ability to support a minimum of 6 ink colors." I do not understand this request; there is no RIP that will accept an HPRTL and HPIGL/2.	The Department is aware of at least one (1) device that can support HP RTL and HP1GL/2.; however, the Department is waiving this requirement. Please see the Department's website for this revision.
4	An Epson 9800 is only capable of printing up to 44" and not 46".	Width between 40" to 46" is acceptable.
