What is STAR?
The School Tax Relief (STAR) Program, which became law in 1997, provides a partial exemption from school property taxes for owner occupied, primary residences such as one, two and three family houses, condominiums, cooperative apartments, and manufactured homes (also known as mobile homes in Real Property Tax Law).

There are two types of STAR exemptions. Owners who are aged 65 or older, with a combined income of $86,300 or less (increased annually for cost-of-living adjustments) are eligible for the Enhanced STAR exemption. The Enhanced STAR exemption is worth $68,700 in full value assessment (2019-20 school year).

Secondly, owners who occupy their primary residences and whose total income is less than $250,000 are eligible for the Basic STAR exemption. The Basic STAR exemption is $30,000 in full value.

In counties where the median home value is higher than the statewide median home value, the Basic and Enhanced STAR exemptions are prorated up so that homeowners in these areas will realize equivalent tax relief.

How to apply
The individual homeowner must apply to the local assessor by taxable status date in order to receive the STAR exemption. For the Basic STAR exemption, the homeowner must provide proof of ownership and proof of primary residency as requested by the assessor. For the Enhanced STAR exemption, the homeowner must also provide proof of age and proof of income (copies of federal or state income tax forms). Enhanced STAR applicants must reapply each year to prove income eligibility, except for those who elect to participate in the STAR income verification program. Basic STAR applicants apply once but must notify the assessor of changes in eligibility.

Responsibilities of owners of manufactured housing communities
Most people who receive the STAR exemption will see the tax savings directly on their school tax bills. However, for most people who own manufactured homes that are located in communities (also known as mobile home parks), the tax savings will appear on the school tax bill for the manufactured housing community. The owner of the manufactured housing community is responsible for crediting the tax savings against the rent payable on the home that has received the exemption.

The owner or operator of a manufactured housing community may credit the tax savings against the monthly rent in 12 installments, beginning with the first monthly rental payment.
due 60 days after the penalty-free period for the payment of taxes and continuing for 11 months. Alternatively, the community owner (or operator or agent) may either: (1) credit the total reduction against the first month's rent, with any balance credited against the following month(s)' rent(s) until exhausted, or (2) pay the total reduction to the manufactured home owner within 60 days of the interest-free collection period.

Failure of an owner or operator of a manufactured housing community to comply shall be a violation punishable by a fine not to exceed $500 per violation.

How STAR exemption is calculated

The assessor is responsible for calculating the STAR exemption. Let's take the case of the Stardust Manufactured Housing Community located in Anytown, NY that assesses at 10 percent of market value. Stardust Manufactured Housing Community has 7 pads and 7 manufactured homes. The assessor should provide the manufactured home park owner with the STAR exempt amount of each manufactured home and the total exempt amount. The total assessed value of the manufactured home park is given on the school tax bill. For example, the Assessor of Anytown has assessed Stardust Manufactured Housing Community as follows:

- 7 pads values @ $4,000/pad = $28,000
- 7 manufactured homes = $49,000
- Total assessed value = $77,000

<td><strong>$18,870</strong></td>
</tr>
</tbody>
</table>

Two homeowners, Bettinger and Evans, applied and were approved for the Enhanced STAR exemption. Two additional owners, Daniels and Fitzgerald applied for and received the Basic Exemption. Because Anytown assesses at 10% of market value, the Enhanced STAR works by exempting up to the first $6,870 of assessed value for each home. The Basic STAR exempts up to the first $3,000 of assessed value.

The home values of Bettinger and Evans are $6,000 and $7,000 respectively. The Enhanced STAR exempt amounts are $6,000 and $6,870. The Basic exempt amounts for Daniels and Fitzgerald are each $3,000. The total exempt amount is $18,870. The STAR law states that the exemption cannot exceed the total assessed value attributable to the manufactured home.

The Assessor of Anytown subtracts the STAR exemption total of $18,870 from the total assessed value of $77,000 to arrive at the taxable assessed value of $58,130.

### How owners distribute the benefits to tenants

The tenant in a manufactured housing community that receives the STAR exemption is entitled to a rent reduction equal to the amount by which taxes on the home were reduced after allowing for a 2% reduction. The owner of the manufactured housing community is allowed to retain 2% of the STAR savings for record-keeping expenses. In the example, the STAR tax reduction is to be distributed to Bettinger and Evans of Stardust Manufactured Housing Community.

#### 1. Obtain information from your Assessor

The assessor can give the owner of the manufactured housing community (or the owner obtains from the assessor) the following information:

- **Exempt amount of each manufactured home that receives a STAR exemption**

#### 2. Obtain information from tax bill

The following information is listed on the tax bill or can be obtained from the assessor:

- **STAR savings**
- **STAR exemption total**

If the School Tax Rate is $160 per thousand dollars of assessed value, the owner of the Stardust Manufactured Housing Community will see the following on the school property
tax bill: “Your tax savings resulting from the New York state school tax relief (STAR) program is $3003.20.”

- **Tax rate x \( \frac{\text{STAR Exemption Total}}{1000} \) = STAR Savings**

$$160 \times \frac{18,870}{1,000} = 3003.20$$

3. Determine amount of savings to be distributed

The owner of Stardust deducts 2% of the STAR savings for record keeping purposes and the rest of the STAR savings are to be distributed to the eligible owners.

\[
\text{STAR Savings} = \frac{3003.20}{1000} = 3003.20
\]

\[
\text{Savings to distribute} = 2943.15
\]

4. Calculate individual homeowner savings in rent reduction

Once the individual savings have been calculated, the owner of the manufactured housing community may (1) credit the tax savings against the monthly rent in 12 installments beginning with the first monthly rental payment due 60 days after the penalty-free period for the payment of taxes and continuing for 11 months, OR (2) credit the total reduction against the first month’s rent, with any balance credited against the following month(s)’ rent(s) until exhausted, OR (3) pay the total reduction to the tenant within 60 days of the interest-free collection period.

The rent he pays to Stardust’s owner must be reduced to reflect the fact that the taxes attributable to this unit are to be paid directly by Hanks, rather than by Stardust’s owner. Again, Stardust’s owner is entitled to retain a 2% administrative expense for the amount of the rent reduction.

If you have any questions or need additional information regarding applying for the STAR program or the calculations of the STAR program exemptions, please contact:
