

STATE OF NEW YORK
DEPARTMENT OF TAXATION AND FINANCE
COMMISSIONER OF TAXATION AND FINANCE
ALBANY, NEW YORK

Pursuant to the authority contained in subdivision First of section 171, paragraph (1) of subsection (a) of section 671, subsection (a) of section 697, subsection (a) of section 1329, subsection (a) of section 1332; section 15-105 and subdivision (a) of section 15-108 of the Codes and Ordinances of the City of Yonkers; and section 5 of Part Z-1 of Chapter 57 of the Laws of 2009; the First Deputy Commissioner of Taxation and Finance, being duly authorized to act due to the vacancy in the office of the Commissioner of Taxation and Finance hereby proposes to make and adopt the following amendments to the New York State Personal Income Tax Regulations under Article 22 of the Tax Law, the City of Yonkers Income Tax Surcharge on Residents Regulations, and to Appendixes 10 and 10-A, which comprise the regulations with respect to the New York State and City of Yonkers withholding tables and other methods, as published in Title 20 of the Official Compilation of Codes, Rules and Regulations of the State of New York, to read as follows:

Section 1. Paragraph (1) of subdivision (b) of section 171.4 of the New York State Personal Income Tax Regulations, as published in Subchapter A of Chapter II of such Title, is amended to read as follows:

(b)“Supplemental wages.” (1) General. Where supplemental wages (such as bonuses, commissions, overtime pay, sales awards or tips) are paid at the same time as regular wages, the New York State personal income tax to be deducted and withheld should be determined as if the total of the supplemental and regular wages were a single wage payment for the regular payroll period. Where supplemental wages are paid at a different time, an employer may determine the New York State personal income tax to be withheld by adding the supplemental wages either to the regular wages for the current payroll period or to the regular wages for the

last preceding payroll period within the same calendar year. However, if New York State personal income tax has been withheld from an employee's regular wages, an employer may withhold New York State personal income tax from the supplemental wages at a rate equal to the rate of New York State personal income tax to be withheld from the highest denominated taxable income applicable to withholding from salaries and wages (e.g., [11.03] 9.77 percent for supplemental wages paid after [April 30, 2009] December 31, 2009), without any allowance for withholding exemptions.

Section 2. Subdivision (b) of section 251.1 of the City of Yonkers Income Tax Surcharge on Residents Regulations, as published in Subchapter C of Chapter II of such Title, is amended to read as follows:

(b) Supplemental wages. The provisions of section 171.4(b) of this Title with respect to the withholding of New York State personal income tax on supplemental wages shall also be applicable to the withholding of City of Yonkers income tax surcharge on residents, except with regard to the rate prescribed in such section. For City of Yonkers income tax surcharge on residents withholding purposes, an employer may withhold from the supplemental wages at a rate which is equal to the product of the rate of the City of Yonkers income tax surcharge on residents for the applicable taxable year multiplied by the rate of New York State personal income tax to be withheld from the highest denominated taxable income applicable to withholding from salaries and wages (e.g., for supplemental wages paid after [April 30, 2009] December 31, 2009, ten percent multiplied by [11.03] 9.77 percent which equals [1.103] .977 percent), without any allowance for withholding exemptions.

Section 3. Three pages of Appendix 10, New York State Income Tax Withholding Tables and Other Methods, denominated 'Method II: Exact Calculation Method' (Single, Married, and Examples, respectively), which pages are numbered T-13, T-14, T-14-A, are REPEALED and new such pages are added to Appendix 10 of such Title to read as follows:

Steps for computing the amount of tax to be withheld:

Step 1 If the number of exemptions claimed is ten or fewer, look up the total exemption and deduction amount in Table A on page T-12, according to the payroll period and marital status claimed. (If there are more than 10 exemptions, multiply the number by the exemption amount in Table C on page T-12 and add it to the deduction amount from Table B.) Subtract the total exemption and deduction amount from the wages to get net wages.

For weekly payroll periods, if the amount of net wages is \$600 or less, you may use the simplified Dollar to Dollar Withholding Table beginning on page T-15 to find the amount to withhold. Otherwise, continue with Step 2.

Step 2 Locate the table on this page for the appropriate payroll period. Find the line on which the net wages fall between the amounts in Columns 1 and 2.

Step 3 Following across on the line you found in Step 2, subtract the amount in Column 3 from the net wages.

Step 4 Following across the same line, multiply the result from Step 3 by the amount in Column 4.

Step 5 Following across on the same line, add the result from Step 4 to the amount in Column 5. The resulting sum is the amount to withhold from wages.

See page T-14A for withholding calculation examples using Method II.

Steps for computing the amount of tax to be withheld:

Step 1 If the number of exemptions claimed is ten or fewer, look up the total exemption and deduction amount in Table A on page T-12, according to the payroll period and marital status claimed. (If there are more than 10 exemptions, multiply the number by the exemption amount in Table C on page T-12 and add it to the deduction amount from Table B.) Subtract the total exemption and deduction amount from the wages to get net wages.

For weekly payroll periods, if the amount of net wages is \$600 or less, you may use the simplified Dollar to Dollar Withholding Table beginning on page T-15 to find the amount to withhold. Otherwise, continue with Step 2.

Step 2 Locate the table on this page for the appropriate payroll period. Find the line on which the net wages fall between the amounts in Columns 1 and 2.

Step 3 Following across on the line you found in Step 2, subtract the amount in Column 3 from the net wages.

Step 4 Following across the same line, multiply the result from Step 3 by the amount in Column 4.

Step 5 Following across on the same line, add the result from Step 4 to the amount in Column 5. The resulting sum is the amount to withhold from wages.

See page T-14-A for withholding calculation examples using Method II.

Method II Exact Calculation Method Examples

Single

Example 1: Weekly payroll, \$400 gross wages, single, 3 exemptions

1. Amount from Table A on page T-12 is \$191.90 for single, weekly payroll, 3 exemptions. \$400 wages - \$191.90 = \$208.10 net wages.
2. Use Table II - A on page T-13 for single, weekly payroll. Look up \$208.10 and use line 2 on which \$208.10 is greater than Column 1 (\$154) but less than Column 2 (\$212).
3. $\$208.10 - \154 (from Column 3, line 2) = \$54.10.
4. $\$54.10 \times .0450$ (from Column 4, line 2) = \$2.43.
5. $\$2.43 + \6.15 (from Column 5, line 2) = \$8.58. Withhold this amount.

Example 3: Monthly payroll, \$50,000 gross wages, single, 3 exemptions

1. Amount from Table A on page T-12 is \$831.15 for single, monthly payroll, 3 exemptions. \$50,000 wages - \$831.15 = \$49,168.85 net wages.

Steps for computing the amount of tax to be withheld:

Step 1 If the number of exemptions claimed is ten or fewer, look up the total exemption and deduction amount in Table A on page T-56, according to the payroll period and marital status claimed. (If there are more than 10 exemptions, multiply the number by the exemption amount in Table C on page T-56 and add it to the deduction amount from Table B.) Subtract the total exemption and deduction amount from the wages to get net wages.

For weekly payroll periods, if the amount of net wages is \$600 or less, you may use the simplified Dollar to Dollar Withholding Table beginning on page T-59 to find the amount to withhold. Otherwise, continue with Step 2.

Step 2 Locate the table on this page for the appropriate payroll period. Find the line on which the net wages fall between the amounts in Columns 1 and 2.

Step 3 Following across on the line you found in Step 2, subtract the amount in Column 3 from the net wages.

Step 4 Following across the same line, multiply the result from Step 3 by the amount in Column 4.

Step 5 Following across the same line, add the result from Step 4 to the amount in Column 5. Multiply the result by 10% (.10). Withhold the resulting product from wages.

See page T-58-A for withholding calculation examples using Method II.

Steps for computing the amount of tax to be withheld:

Step 1 If the number of exemptions claimed is ten or fewer, look up the total exemption and deduction amount in Table A on page T-56, according to the payroll period and marital status claimed. (If there are more than 10 exemptions, multiply the number by the exemption amount in Table C on page T-56 and add it to the deduction amount from Table B.) Subtract the total exemption and deduction amount from the wages to get net wages.

For weekly payroll periods, if the amount of net wages is \$600 or less, you may use the simplified Dollar to Dollar Withholding Table beginning on page T-59 to find the amount to withhold. Otherwise, continue with Step 2.

Step 2 Locate the table on this page for the appropriate payroll period. Find the line on which the net wages fall between the amounts in Columns 1 and 2.

Step 3 Following across on the line you found in Step 2, subtract the amount in Column 3 from the net wages.

Step 4 Following across the same line, multiply the result from Step 3 by the amount in Column 4.

Step 5 Following across the same line, add the result from Step 4 to the amount in Column 5. Multiply the result by 10% (.10). Withhold the resulting product from wages.
