# Introduction

This publication summarizes local sales and use tax activity in New York as reported on tax returns by vendors and purchasers. It includes a statistical table for each New York State county depicting annual taxable sales and purchases data for each of the last five years. Each county table also contains semiannual sales tax information by industrial classification for the last 18 months. Data for the six-month selling period, March 1995 through August 1995, are revised from the last report. Information for September 1995 through February 1996 is preliminary and will be revised in our next report.

Taxable sales include nearly all retail sales of tangible personal property and certain services. Taxable purchases represent the value of tangible personal property or services purchased for use in business operations (which would otherwise be subject to tax) on which no sales tax was previously paid.

*Annual taxable sales exceed \$165.1 billion Statewide*

Table 1 summarizes annual sales and purchases subject to use tax for all New York counties during the past 5 years. Taxpayers reported over \$165.1 billion in taxable sales and purchases on their returns for the period beginning in March 1995 and extending through February 1996. This value represents a 3.6 percent increase from the previous year.

**Table 1: Statewide Annual Totals (In Thousands)**

	Taxable Sales & Purchases	Change from Previous Period	
		Amount	Period
3/91 - 2/92	\$143,492,891	\$2,029,502	-1.39
3/92 - 2/93	146,652,533	3,159,642	2.20
3/93 - 2/94	152,151,747	5,499,214	3.75
3/94 - 2/95	159,481,038	7,329,291	4.82
3/95 - 2/96*	165,275,892	5,794,854	3.63

\*Preliminary

---

As depicted in Figure 1, total taxable sales and purchases reported in the most current period continue the upward trend that began during the March 1992 through February 1993 selling period. Aggregate annual taxable sales and purchases have grown by 15 percent during the past five years.

Figure 1: 5-year Trend

---

## Industry Analysis

Taxable sales and purchases for the September 1995 through February 1996 semiannual selling period reached \$83.6 billion. This amount exceeds the total reported for the previous selling period by \$1.9 billion and represents the highest statewide semiannual total ever recorded. For the latest six-month selling period, the percentage growth in taxable sales and purchases more than doubled, from 1.1 to 2.3 percent, compared with the percent change from the prior period.

Retail trade continues to account for over half of all taxable sales, contributing \$45.5 billion to the statewide total for the latest semiannual selling period. During this period, retail trade sales rose 3.1 percent from the same period one year earlier. Within the retail sector, miscellaneous retailers reported an 8.2 percent increase in taxable sales from the previous September through February reporting period.

**Table 2: Statewide Semi-annual Industry Totals (In Thousands)**

Industry	Selling Period		
	9/94 - 2/95	3/95 - 8/95**	9/95 - 2/96*

<b>Grand Total</b>	<b>\$80,814,886</b>	<b>\$81,704,289</b>	<b>\$83,571,603</b>

Note: This table represents the sum of taxable sales and purchases for all counties imposing a sales tax, plus taxable sales and purchases in Oswego County.

\*Preliminary

\*\*Revised

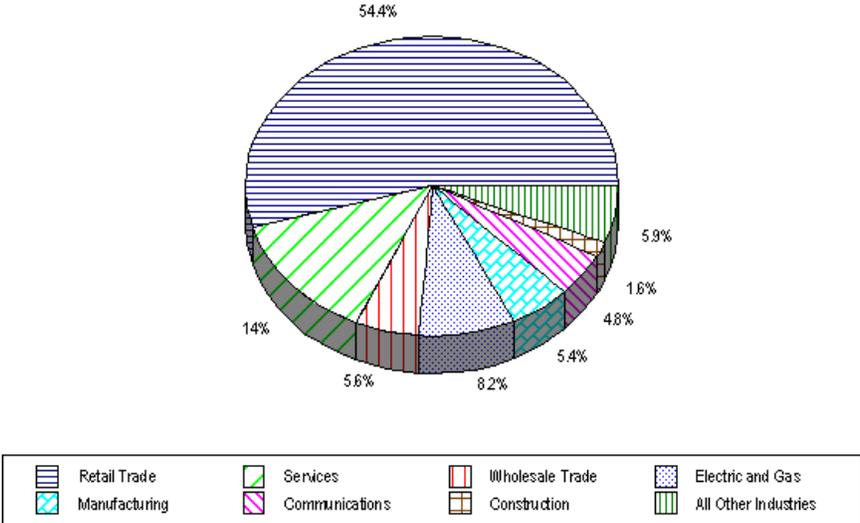

Statewide year-over-year growth for the latest semiannual selling period varied by major industry. The gas, electric and sanitary services sector reported the largest percentage growth. This category includes energy sales to all commercial establishments and noncommercial sales in counties imposing a tax on residential use. The 9.4 percent increase from the previous year is primarily attributable to a harsher winter season and higher energy bills. In contrast, wholesale trade and construction reported year-over-year declines.

Concerning other major industry groups, services sales grew 4.4 percent from the previous year. Within this sector, hotels reported significant gains (8.3 percent) with taxable sales for these businesses reaching nearly \$1.8 billion during the most recent six months. Other services experienced the fastest growth over the past year, increasing by 14 percent. Sales trends for the communications and manufacturing groups

were generally flat. All other industries, including miscellaneous businesses and businesses with missing industry codes, grew 13.7 percent. The Office of Tax Policy Analysis (OTPA) is developing new techniques for assigning industry codes to many vendors in this broad category.

Figure 2 shows the statewide share of taxable sales and purchases contributed by major industry for the latest selling period. The distribution has remained fairly constant since the State enacted the sales tax in 1965. Retail sales and taxable services combined contribute over two-thirds of the State total.

**Figure 2: Industry Shares**

**Regional Trends**

Nearly all of the State’s counties showed year-over-year growth in taxable sales and purchases. Figure 3 provides a glimpse of regional sales activity. As shown, the largest percentage year-over-year gains were reported in the Finger Lakes area. All counties in the Capital and Long Island regions reported increased sales.

---

Table 3 indicates that most counties experienced an increase in total taxable sales and purchases for the September 1995 through February 1996 period as compared to the same period of the previous year. The upstate counties of Essex, Ontario, Schoharie and Seneca reported double digit percentage growth. Major industry contributors to county-level growth included manufacturing in Essex, general merchandise and apparel in Ontario, auto sales in Schoharie and a new shopping mall specializing in apparel in Seneca.

Tioga County experienced the largest year-over-year decline in aggregate activity, falling by 8 percent. Although sales tax-related activities generally fell across the board, manufacturing was hit particularly hard.

\*Preliminary data

a/ Estimated

## New York City

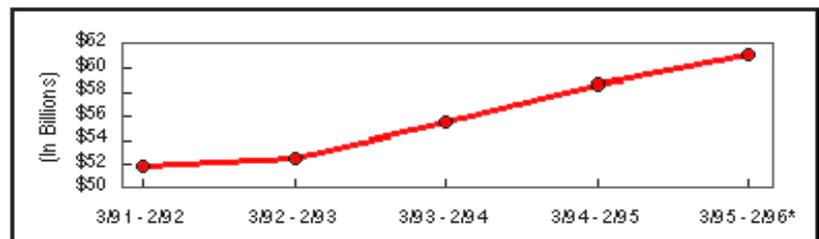

The five New York City counties of the Bronx, Kings, New York (Manhattan), Queens and Richmond represent nearly 38 percent of all reportable statewide taxable sales and purchases for the latest annual period. New York City taxable sales continue to grow more than the State as a whole. Year-over-year City taxable sales and purchases rose 4.2 percent, exceeding the 3.3 percent growth rate for all other State counties. Similar to the State economy, New York City sales have continuously grown over the last half-decade from \$51.9 billion in 1991-92 to nearly \$61 billion in 1995-96 (Figure 4).

**Table 4: New York City Annual Totals (In Thousands)**

Period	Taxable Sales & Purchases	Change from Previous Period	
		Amount	Percent
3/91 - 2/92	\$51,882,801	-\$1,905,318	-3.54
3/92 - 2/93	52,570,093	687,292	1.32
3/93 - 2/94	55,462,615	2,892,522	5.50
3/94 - 2/95	58,523,293	3,060,678	5.52
3/95 - 2/96*	60,996,779	2,473,486	4.23

\*Preliminary

**Figure 4: 5-year Trend**

\*Preliminary

Table 5 summarizes City taxable sales and purchases for the most recent six-month selling period ending February 1996. For that period, sales tax vendors reported \$31.6 billion in City taxable sales and purchases. New York City taxable sales and purchases increased 5.2 percent when compared to the September through February 1995 selling period.

For both the State and City, retail sales provide the largest share of all taxable sales and purchases. However, while retail sales represent more than half (54 percent) of all taxable sales statewide, they represent less than half (47 percent) within the City. This disparity reflects the greater

importance of taxable services to the City's sales tax base. All other industries, and electric and gas industries posted the largest percentage increases, rising 18.6 and 13.1 percent from the previous year. Retail trade reported the largest dollar growth --- nearly \$605 million. Within that sector, miscellaneous retail activity expanded at the fastest rate. The furniture stores reported the only decline within the retail trade sector.

**Table 5: New York City Semi-annual Industry Totals (In Thousands)**

Industry	9/94 - 2/95	Selling Period	
		3/95 - 8/95**	9/95 - 2/96*

## Counties Outside New York City

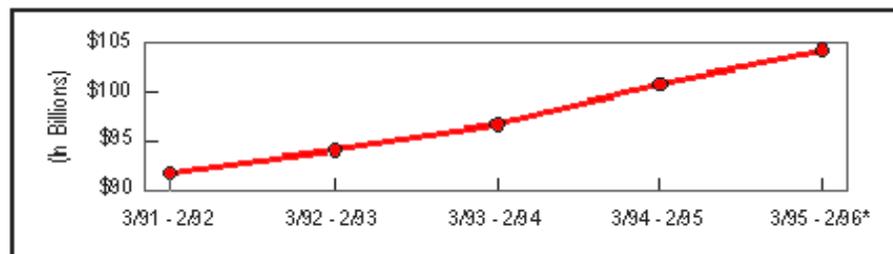

Taxable sales and purchases in counties outside New York City exceeded \$104 billion for the latest reporting year (Table 6). This total represents a 3.3 percent increase from the previous year and 13.9 percent increase from five years ago. These totals include taxable sales in all counties imposing a sales tax plus an estimate of total taxable sales for Oswego County. As depicted in Figure 5, the five year trend in taxable sales and purchases reported outside of New York City is similar in direction to the New York City totals but varies less between years.

**Table 6: All County Totals  
Outside of New York City  
Annual Totals

3/95 - 2/96*	104,279,113	3,321,368	3.29

\*Preliminary

**Figure 5: 5-year Trend**

\*Preliminary

Oswego remains the only New York State county without a county-wide local sales tax. However, beginning with the March through May 1995 sales tax quarter, all vendors doing business in Oswego County (outside the cities of Fulton and Oswego) now should report the State sales tax on the newly created Oswego County line. Beginning with the March through August 1995 selling period, this publication reports taxable sales and purchases subject to use tax for the entire county (including the cities of Fulton and Oswego). We also estimated annual totals for earlier years.

Analysis of the semiannual data by industry presented in Table 7 reveals that the other services, general merchandise and all other industries reported the greatest year-over-year percentage gains. Most other major industries reported slight declines.

\*\*Revised

## Methodology and Data Limitations

The taxable sales and purchases statistics presented in this report come from more than three million data items. These data are reported on nearly 500,000 sales tax returns filed each quarter with the New York State Department of Taxation and Finance. The year-ending sales tax quarter that closes on May 31 involves an additional 134,000 returns from taxpayers filing annual returns only. The report aggregates quarterly data into semiannual periods to reduce the fluctuation caused by vendor late reporting.

This report provides a snapshot of a continuously changing sales tax file. File records are updated daily to reflect late payments, amended returns, audit changes and missing industry identification codes. Only after nine months does the file become stable enough to serve as the data base for preparing this report.

---

This report incorporates a new statistical format that provides historical annual taxable sales information. The data in this report differ from previously released information. The Office of Tax Policy Analysis (OTPA) adjusted historical statewide totals for the previous four years to include taxable sales and purchases reported throughout Oswego County. Data reported on the new Oswego County line for the latest twelve-month selling period serves as the basis for this adjustment. Previous reports contained taxable sales and purchases only for the cities of Fulton and Oswego which impose a local sales tax. The availability of this new information enables OTPA to quantify activity within Oswego County outside the cities of Fulton and Oswego.

The revised data in this publication for the period March through August 1995 supersede information included in the last report. Although this report includes information for a 12-month period, special care should be taken when computing an annual percent change. As noted above, sales tax data are subject to continual revision. A significant part of these revisions relates to vendor over- and under-reporting. That is, vendors filing late returns frequently combine prior and current liabilities on their most current return. The revisions are then necessary to move the data to the correct period. Therefore, caution should be taken when drawing conclusions concerning regional economic trends based solely upon the data presented herein.

This report generally classifies taxable sales and purchases within industrial sectors based on the vendor-reported code listed on each tax return. These codes are either the Principal Industry Activity (PIA) classification or the federal Standard Industrial Classification (SIC). While these two codes are fairly comparable, a more detailed classification is available only for vendors using the SIC code. Appendix A identifies the SIC/PIA classifications used in this report. Classification problems arise when vendors use PIA codes in lieu of SIC codes. More troublesome problems arise when taxpayers inadvertently misclassify their primary business activity. For example, a wholesaler who also conducts retail sales may not understand to classify the business as wholesale trade. Misclassification problems are nearly impossible to remedy.

For all counties, the electric and gas industry segment contains nonresidential energy taxable sales. However, New York State and a

---

number of counties, listed in Appendix B, do not tax residential energy sales. Therefore, the electric and gas tax base varies by county with some areas taxing both residential and nonresidential energy sales and others taxing nonresidential sales only. The statewide summary displayed in Table 1 merely accumulates the taxable sales and purchases for each county and does not represent total statewide energy sales.

Appendix C shows combined State and local sales tax rates in each county and city and identifies changes that occurred during the reporting period. These data are presented for informational purposes.

Data users are cautioned that industry taxable sales may represent only a portion of industry gross sales. Moreover, the percent of sales that are taxable can vary from period to period. As such, taxable sales may not directly reflect the correct level or trend in aggregate economic activity for the industry.

# Albany County

# **Appendix A: Principal Industry Activity Codes and Standard Industrial Classification Code Ranges By Industry**

---

The industry codes displayed in this report correspond to the Standard Industrial Classification (SIC) codes published by the U.S. Office of Management and Budget and the Principal Industry Activity (PIA) codes provided by the Internal Revenue Service to taxpayers. Sales tax vendors are asked to identify their primary business function and identify themselves using SIC or PIA codes. This process is voluntary and subject to the tax preparer's understanding of the classification codes.

Industry	2 Digit SIC/PIA Code	4 Digit SIC Code Range
Construction	15, 16, 17	1520-1799
Manufacturing	20-39	2010-3999
Communication	48	4810-4899
Electric and Gas	49	4910-4971
Wholesale Trade	50-51	5010-5199
Retail Trade	52-59	
Building Materials		5210-5271
General Merchandise		5310-5399
Food		5410-5499
Auto Dealers, Gas Stations		5510-5599
Apparel		5610-5699
Furniture		5710-5736
Eating and Drinking		5810-5813
Miscellaneous Retail		5910-5999
Services	70-89	
Hotels		7010-7041
Personal Services		7210-7299
Business Services		7310-7389, 7476, 7914
Auto Repair, Parking		7510-7549
Other Services		7620-8999
All Other Industries		
Transportation	40-47	4010-4789
Finance, Insurance and Real Estate	60-67	6010-6799

Note: The "All Other Industries" category also includes data for unclassified industries and those industries for which no code was provided.
