Introduction

Article 29 of the Tax law authorizes counties, cities and some school districts to impose a local sales tax as a complement to the statewide tax. This report presents statistical information on taxable sales and purchases subject to the county or the New York City sales tax. Taxable sales include nearly all retail sales of tangible personal property and certain services. Taxable purchases represent the value of tangible personal property or services purchased for use in business operations (which would otherwise be subject to tax) on which no sales tax was previously paid.

Data presented herein are derived from vendors' and purchasers' information reported on New York State sales tax returns. This publication presents (1) five year statewide annual trends, (2) statewide trends for the three most recent semiannual selling periods, (3) regional trends, and (4) sales tax activity by industry for New York City and counties outside the City. Each county data table also contains semiannual sales tax information by industrial classification for the most recent 18 months.

During the six-month period prior to the issuance of this report, an intensive effort was undertaken to identify the standard industry code (SIC) for the growing number of vendors in the "Unclassified by Industry" sector. The outcome of this endeavor was the industry classification of some 29,000 previously unclassified vendors. The data for the March through August 1998 six-month selling period and the September 1998 through February 1999 six-month selling period were revised to reflect the reclassification of these 29,000 vendors.

Annual Sales and Purchases

Table 1 summarizes annual sales and purchases subject to use tax for all New York counties during the past five years. During this period, annual sales grew each year when compared with sales reported for the previous year. Revised data for March 1998 through February 1999 indicates that reported sales grew to \$189.1 billion, a 3.92 percent improvement from the previous year.

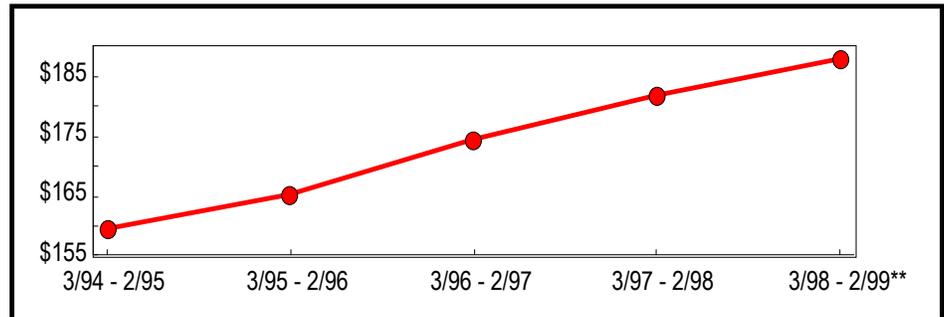

Table 1: Statewide Annual Totals (In Thousands)

Period	Taxable Sales & Purchases	Change from Previous Period	
		Amount	Percent
3/94 - 2/95	\$159,481,038	\$7,329,291	4.82
3/95 - 2/96	165,263,235	5,782,197	3.63
3/96 - 2/97	174,305,443	9,042,208	5.47
3/97 - 2/98	181,974,425	7,668,982	4.40
3/98 - 2/99**	189,101,218	7,126,793	3.92

** Revised

Figure 1 depicts that the March 1998 through February 1999 selling period continued the upward trend of annual sales that has been underway since the March 1994 through February 1995 selling period. As a result, total taxable sales and purchases now stand 18.6% higher than the value posted five years ago.

Figure 1: Statewide Five-Year Trend (In Billions)

** Revised

Industry Analysis

Table 2 provides a look at statewide semiannual industry totals. Taxable sales and purchases for the March through August 1999 semiannual selling period reached \$100 billion. This amount exceeds the total reported for the previous year's comparable six-month selling period by 6 percent (\$5.7 billion).

Statewide, all but one major industry realized year-over-year growth for the latest semiannual selling period. The most significant increase was in the retail trade sector which reported gains of 6.5 percent. Percentage increases for the remaining major industry groups ranged from 2.1 percent in the agriculture, mining, transportation, finance, insurance and real estate (FIRE), and government sector to 6 percent in services. Electric, gas & sanitary services, which had not realized a year-over-year gain since the August 1996 through February 1997 semiannual period, experienced a growth rate of 5.9 percent.

The only industry to report a decline in taxable sales for the latest six-month period was the manufacturing sector. Its sales and purchases were down by 0.8 percent.

Retail sales continue to account for over half of taxable sales, contributing \$56 billion to the statewide total. During this most current six-month selling period, retail sales rose 6.5 percent from the previous year. Within retail sales, furniture and building materials reported the largest percentage increases in sales at 12 and 11.6 percent, respectively. Retail sales in building materials continued the upward trend noted in the September 1998 through February 1999 semiannual period. Percentage increases in the food, auto dealers and gas stations, and eating and drinking categories also exceeded the gain reported for the retail industry as a whole.

* Preliminary

** Revised

Within services, personal services reported growth of more than 12.9 percent from the previous year, continuing the trend noted during the last semiannual period. Business services and hotels also continued their upward trend in taxable sales with growth exceeding 6.8 percent and 5.1 percent, respectively.

Figure 2 shows the statewide share of taxable sales and purchases contributed by major industry for the latest selling period. This distribution has remained fairly constant since the State enacted the sales tax in 1965. Retail trade and services combined continue to contribute over two-thirds of the State total.

Figure 2: Statewide Industry Shares

Regional Trends

All of the State's counties, with the exception of Chemung and St. Lawrence counties, showed year-over-year gains in taxable sales and purchases. Figure 3 provides a glimpse of regional sales activity. As shown, year-over-year gains were widely dispersed throughout the State. The Capital Region and Central New York Region generally outperformed the state average growth rate of 6 percent.

Figure 3.
Change in Taxable Sales and Purchases
March 1999 - August 1999
Compared to
March 1998 - August 1998

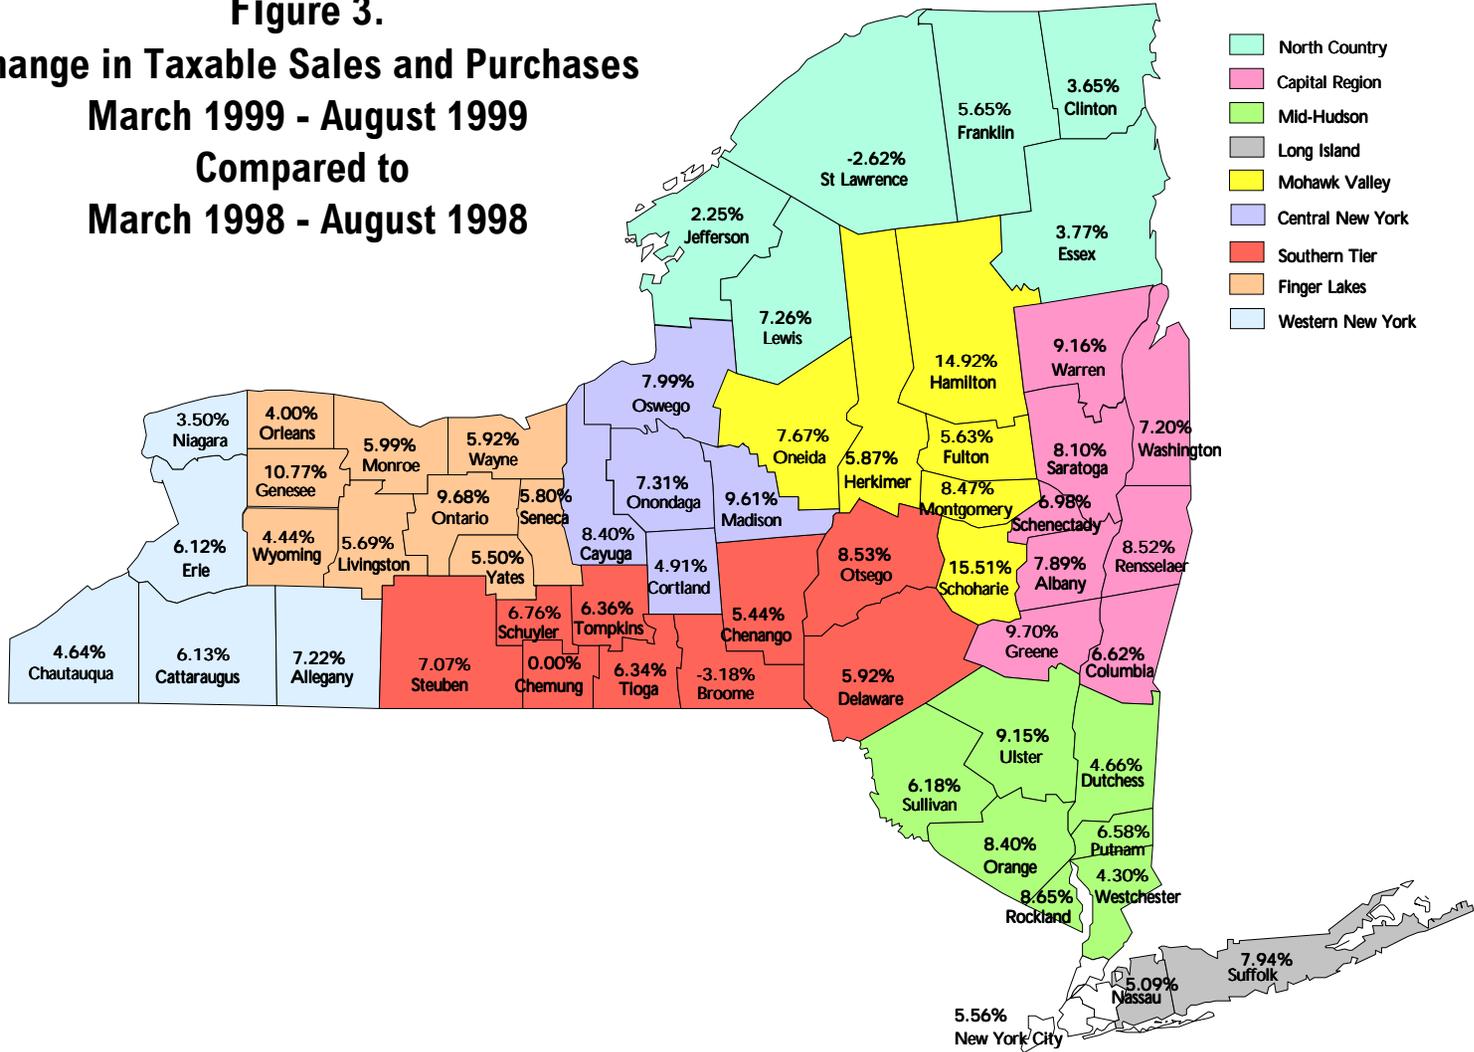

Table 3 indicates that three counties led the way in reporting double digit growth in total taxable sales and purchases for the March through August 1999 period as compared to the same period of the previous year. Of the remaining counties reporting gains in taxable sales and purchases, all but Jefferson county experienced a growth rate of more than 3 percent.

Schoharie and Hamilton counties experienced the most significant growth in taxable sales, reporting gains of 15.5 and 14.9 percent, respectively. Schoharie county's most significant gain was in the manufacturing industry where reported taxable sales and purchases were up 57 percent from the same reporting period in the previous year. Sales in the services sector increased by 23.1 percent, with the most notable gains reported in miscellaneous services (47.3 percent) and hotels (34.7 percent). Much of Schoharie county's reported gains were due to increased sales in industries related to computer systems. The only two industries reporting losses were electric, gas, & sanitary services (-9.2 percent) and agriculture, mining, transportation, FIRE and government (-2.8 percent).

Hamilton county's gains were more broadly distributed with manufacturing, wholesale trade, and agriculture, mining, transportation, FIRE and government all experiencing gains of 26 percent or more. Further analysis of this data indicates that the growth in taxable sales in these industries is related, in part, to the reporting on tax returns of previously unreported sales in the technology industry. Similar to Schoharie county, Hamilton county also reported a decline in the electric, gas, & sanitary services sector (-7.1 percent). Hamilton county also experienced a small decline in its construction industry, with taxable sales and purchases off by 1.9 percent.

Genesee county reported double digit gains in taxable sales and purchases, growing by 10.8 percent from the same reporting period in the previous year. Genesee county's gains were also widely dispersed among several industries with services (14.2 percent), retail trade (13 percent) and construction (10.1 percent) providing the major stimuli. The only industry to report a loss was the communications industry with a 12.5 percent decline in reported sales and purchases.

St. Lawrence county was the only county to report any year-over-year decline in aggregate activity, falling by 2.6 percent. Within St. Lawrence

county, the drop in taxable sales was mainly attributed to agriculture, mining, transportation, FIRE, and government services (-35.1 percent), electric, gas & sanitary services (-28.1 percent) and manufacturing (-25.8 percent).

New York City

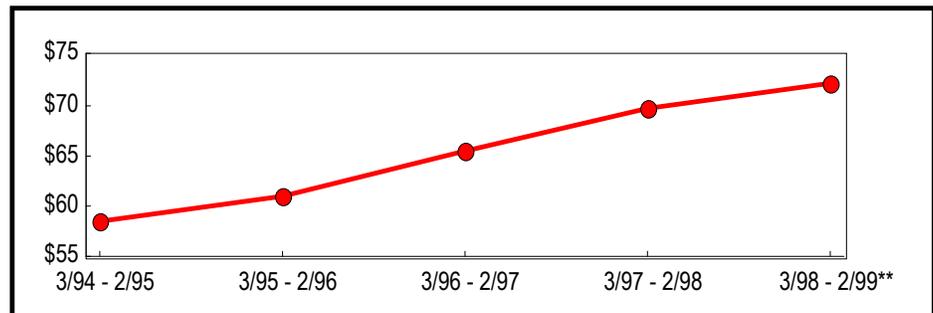

The five New York City counties of the Bronx, Kings, New York (Manhattan), Queens and Richmond represent 37.7 percent of all reportable statewide taxable sales and purchases for the latest annual period. New York City taxable sales continue to grow faster than the State as a whole. Year-over-year New York City's taxable sales and purchases rose 4.1 percent, exceeding the 3.8 percent combined growth rate for all other State counties. Similar to the State's economy, New York City sales have continually expanded since the early 1990's, growing from \$58.5 billion in 1994-1995 to \$72.5 billion in 1998-1999 (Table 4 and Figure 4).

Table 4: New York City Annual Totals (In Thousands)

Period	Taxable Sales & Purchases	Change from Previous Period	
		Amount	Percent
3/94 - 2/95	\$58,523,293	\$3,060,678	5.52
3/95 - 2/96	61,107,397	2,584,104	4.42
3/96 - 2/97	65,565,929	4,458,532	7.30

3/98 - 2/99**	72,469,155	2,882,247	4.14

** Revised

Figure 4: Five-Year Trend (New York City) (In Billions)

** Revised

Table 5 summarizes New York City's taxable sales and purchases for the most recent six-month selling period ending August 1999. For that period, sales tax vendors reported \$37.9 billion in New York City taxable sales and purchases, an increase of 5.6 percent over the same period one year earlier.

For both the State and City, retail sales provide the largest share of all taxable sales and purchases. However, while retail sales represent 56 percent of all taxable sales statewide, they represent only 47 percent within the City. This disparity reflects the greater importance of taxable services to New York City's sales tax base.

The electric, gas & sanitary services industry posted the largest percentage increase, rising 13.9% from the previous year. This increase ends the downward trend that has been evident since the March 1995 - August 1996 study. Within services, personal services reported the largest gain, growing 26.3 percent from the same reporting period in the previous year. Of the major industries, only manufacturing posted a year-over-year decline (-1.0 percent).

Counties Outside New York City

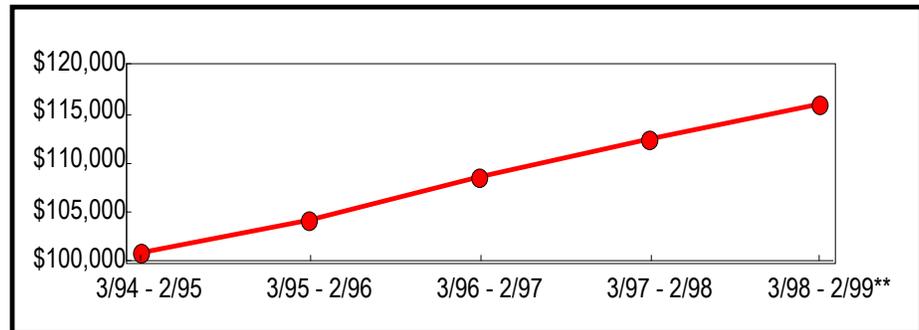

Taxable sales and purchases in counties outside New York City reached \$116.6 billion for the year ending February 1999 (Table 6). This value represents a 3.78 percent increase from the previous year and a 15.5 percent increase from sales reported five years ago. As depicted in Figure 5, the five-year trend in taxable sales and purchases reported outside of New York City is similar in direction to the New York City totals, but annual percentage growth is comparatively lower for each of the five years.

Table 6: All Counties Outside of New York City - Annual Totals (In Thousands)

Period	Taxable Sales & Purchases	Change from Previous Period	
		Amount	Percent

** Revised

Figure 5: Five-Year Trend (Counties Outside of New York City) (In Millions)

** Revised

Analysis of the semiannual data by industry presented in Table 7 reveals that the retail trade, services, and wholesale trade industries reported the largest gains from the same period in the previous year. Retail trade grew by 7.2 percent, while services and wholesale trade reported gains of more than six percent. Within retail trade, sales from furniture and building materials saw significant gains, up 13 percent and 11.9 percent, respectively. Of all the major industries, only manufacturing reported lower sales (- 0.7 percent).

Methodology and Data Limitations

The taxable sales and purchases statistics presented in this report come from more than three million data items reported on more than three hundred thousand sales tax returns filed each quarter with the New York State Department of Taxation and Finance. The year-ending sales tax quarter that closes on February 28 involves an additional 250,000 returns from taxpayers filing annual returns only. The report aggregates quarterly data into semiannual periods to dampen fluctuations caused by vendor late reporting, account reconciliation of prior period activities and amended returns.

This report provides a snapshot of a continuously changing sales tax file. File records are updated daily to reflect late payments, amended returns,

audit changes and missing industry identification codes. Only after nine months does the file become stable enough to serve as the data base for preparing this report.

The data in this publication supersedes information included in earlier reports. Although this report includes information for a 12-month period, special care should be taken when computing an annual percent change. As noted above, sales tax data are subject to continual revision. A significant part of these revisions relates to vendor over- and under-reporting. That is, vendors filing late returns frequently combine prior and current liabilities on their most current return. The revisions are then necessary to move the data to the correct period. Therefore, caution should be taken when drawing conclusions concerning regional economic trends based solely upon the data presented here.

This report generally classifies taxable sales and purchases within industrial sectors based on the vendor-reported code listed on each tax return. These codes are either the Principal Industry Activity (PIA) classification or the federal Standard Industrial Classification (SIC). These codes and their corresponding numerical ranges are listed in Appendix A. While these two codes are fairly comparable, a more detailed classification is available only for vendors using the SIC code. Classification problems arise when vendors use PIA codes in lieu of SIC codes. More troublesome problems arise when taxpayers inadvertently misclassify their primary business activity. For example, a wholesaler who also conducts retail sales may not understand to classify the business as wholesale trade. Misclassification problems are nearly impossible to remedy.

The conversion of SIC to NAICS (North American Industry Classification System) codes for sales tax vendors began in August 2000. Initially, this conversion started with new vendors when they registered. Eventually, over the course of several years, all vendors who currently use a SIC code will be updated to the six-digit NAICS code. Work has been completed to create a bridge from SIC to NAICS codes for statistical purposes. However, there is the possibility that some statistics may lose some of their historical comparability. In the long run, though, the benefits of conversion to this new classification system should outweigh any potential loss of historical comparability. The NAICS coding system is a far more comprehensive classification system

than the SIC coding system it will replace, and therefore, should be capable of providing more detailed and accurate statistical information in the future.

For all counties, the electric, gas and sanitary services industry segment contains nonresidential energy taxable sales. However, New York State and a number of counties, listed in Appendix B, do not tax residential energy sales. Therefore, the electric and gas tax base varies by county with some areas taxing both residential and nonresidential energy sales and others taxing nonresidential sales only. The statewide summary displayed in Table 1 merely accumulates the taxable sales and purchases for each county and does not represent total statewide energy sales.

Appendix C shows combined State and local sales tax rates in each county and city and identifies changes that occurred during the most recent six-month reporting period. These data are presented for informational purposes.

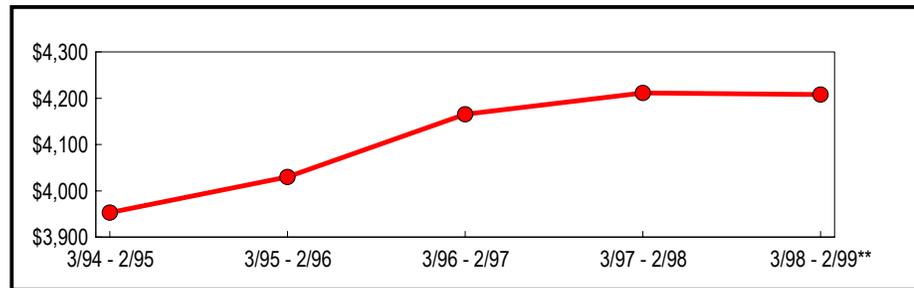

Data users are cautioned that industry taxable sales may represent only a portion of industry gross sales. Moreover, the percent of sales that are taxable can vary from period to period. As such, taxable sales may not directly reflect the correct level or trend in aggregate economic activity for the industry.

Appendix A: Principal Industry Activity Codes and Standard Industrial Classification Code Ranges By Industry

The industry codes displayed in this report correspond to the Standard Industrial Classification (SIC) codes published by the U.S. Office of Management and Budget and the Principal Industry Activity (PIA) codes provided by the Internal Revenue Service to taxpayers. Sales tax vendors are asked to identify their primary business function and identify themselves using SIC or PIA codes. This process is voluntary and subject to the tax preparer's understanding of the classification codes.

**Standard Industrial Code and
Principle Industry Activity
Codes Listing**

Industry	2 Digit SIC/PIA Code	4 Digit SIC Code Range
Construction	15, 16, 17	1520-1799
Manufacturing	20-39	2010-3999
Communication	48	4810-4899
Electric and Gas	49	4910-4971
Wholesale Trade	50-51	5010-5199
Retail Trade	52-59	
Building Materials		5210-5271
General Merchandise		5310-5399
Food		5410-5499
Auto Dealers, Gas Stations		5510-5599
Apparel		5610-5699
Furniture		5710-5736
Eating and Drinking		5810-5813
Miscellaneous Retail		5910-5999
Services	70-89	
Hotels		7010-7041
Personal Services		7210-7299
Business Services		7310-7389, 7476, 7914
Auto Repair, Parking		7510-7549
Other Services		7620-8999
All Other Industries		
Transportation	40-47	4010-4789
Finance, Insurance and Real Estate	60-67	6010-6799

Note: The "All Other Industries" category also includes data for unclassified industries and those industries for which no code was provided.
