Appendix: New York State Personal Income Tax Returns — 2000	A-1
--	-----

Introduction

This annual study provides statistical information on 2000 New York State personal income tax returns that were timely filed during 2001. The data are from full-year resident, full-year nonresident, and part-year resident returns. The report categorizes returns as either taxable or nontaxable depending on the presence or absence of taxable income and income tax liability. Data presented include the distribution of New York adjusted gross income and tax liability by residence and the value of deductions, exemptions, and taxable income by income class.

Residents, Nonresidents, and Part-Year Residents

Generally, full year-resident filers for tax purposes are individuals who live in New York during the entire year. However, some full-year residents have a permanent home (i.e. a domicile) in New York, but can live in another state or country for most of the year. Other residents have a permanent home outside the state, but maintain living quarters in New York State for more than half of the tax year. The county of residence for resident filers is as of December 31, 2000.

Nonresident filers are generally individuals who live outside New York, but who receive income from activities within the State. These filers frequently reside in states bordering New York and commute to work in New York. Nonresident filers also include previous New Yorkers presently residing in other states such as Arizona and Florida. Finally, this category includes information from residents of foreign countries receiving taxable income from sources within New York.

Part-year resident filers are individuals who meet the definition of a resident for only part of the tax year. Typically, part-year residents move into or out of the state during the year.

Taxable, Nontaxable, and All Tax Returns

All tax returns filed by residents, nonresidents and part-year residents are categorized as either taxable or nontaxable returns. Returns that have a New York State tax liability after having been processed by the Tax Department are defined as taxable returns. Nontaxable returns do not have a tax liability. Individuals may file nontaxable returns to fulfill legal filing requirements, receive a refund of income tax withholding, or to claim refundable credits. Credits that are refundable without a tax liability include the earned income, child and dependent care, real property and the farmers' school tax credits administered through the personal income tax law.

Due to the terrorist attacks of September 11, 2001, both the federal and New York State governments extended the time for taxpayers to file extension returns for tax year 2000 until after the end of the processing year. Because of this additional filing time, the Office of Tax Policy Analysis spent eight more months compiling data from the population of tax returns than in earlier years in order to include the tax returns from victims of the terrorist attacks in this study. Compiling the data from tax returns that were filed after the end of the processing year resulted in data being gathered from some late-filed returns. The office also captured data from manually processed returns for the first time, because many of the tax returns from victims of the World Trade Center disaster had to be handled manually. The effect of these changes increased the number of tax returns and the amount of income, deductions, tax credits and tax liability in the population file being reported for tax year 2000 in comparison to prior years. As a result of these changes, data users should exercise caution when comparing data from this report with data from previous years.

Comparison With Other OTPA Data

The statistics reported in this publication do not completely coincide with data presented in the *Analysis of 2000 Personal Income Tax Returns* (PIT) publication, which is also prepared by the Office of Tax Policy Analysis (OTPA). This report tabulates information from returns filed with the Tax Department for 2000. The data represent amounts accepted by the Department's tax return processing system and its tolerances. The information is collected prior to income tax exceptions manual review and may contain data entry errors. Analysts have attempted to adjust the most egregious mistakes.

In comparison, OTPA's *Analysis of 2000 Personal Income Tax Returns* data are derived from a statistically valid sample of 112,836 tax returns. After drawing the sample, OTPA subjects each tax return to extensive data verification, editing, and correction. The completed sample file is weighted to represent the 2000 filing universe.

In summary, the PIT publication data pass through a comprehensive verification and correction process subjecting the sampled records to more restrictive data tolerances than the data appearing in this report. However, OTPA's PIT data are also subject to sampling error.

Findings

All Filers Summary

In 2001, the department received more than 8.9 million timely filed New York State personal income tax returns for the 2000 tax liability year. This value compares with 8.5 million tax returns filed for the 1999 tax liability year (an increase of 4.8 percent). These filers reported total New York adjusted gross income of \$652 billion. Aggregate tax liability for 2000 was \$24.7 billion, an increase of 17.6 percent from \$21.0 billion in 1999.

Some major findings for 2000 include:

- Approximately 91 percent of all tax returns and 85 percent of all tax liability were from full-year residents of the state.
- New York adjusted gross income for all filers increased by \$95.8 billion, reflecting a growth rate of 17.2 percent from 1999.
- New York adjusted gross income for full-year residents increased by \$55.9 billion, which is a 14.0 percent increase from 1999.
- The second largest share of New York adjusted gross income and tax liability belonged to full-year nonresidents. Their reported income from federal sources, including non-New York income, reached \$179.2 billion. Income tax liability increased to \$3.2 billion from \$2.7 billion in 1999.
- Part-year resident filers reported the smallest share — \$17.4 billion in income and \$494 million in tax liability.

Table 1: Total Income and Tax Liability by Place of Residence in 2000

(Dollar Data in Thousands)

Tax Liability**	-\$493,590	-\$606	-\$2,990	-\$497,185

* Total income is New York Adjusted Gross Income on resident tax forms IT-100, 200, and 201; and Line 30, Federal amount including non-New York income, on full-year nonresident and part-year resident tax form IT-203.

** Includes refundable tax credits.

Full-Year Residents

The 8.12 million full-year resident tax returns reported New York adjusted gross income (NYAGI) of \$455 billion and a tax of \$21 billion. Table 2 shows 55 percent of all returns had NYAGI of less than \$30,000. This group accounted for 12.3 percent of all income and 1.5 percent of tax liability. Taxpayers in the highest income group, with income in excess of \$200,000, accounted for 2.7 percent of all tax returns, 37.3 percent of NYAGI, and paid 50.1 percent of tax liability.

Table 2: Income Tax Components of Full-Year Residents by Size of Income (All Returns) in 2000
(Dollar Data in T thousands)

Income Class	Number	NYAGI*	Deductions	Dependent Exemptions	Taxable Income	Tax Before Credits	Tax Liability

Total	8,123,044	\$455,401,993	\$87,094,602	\$4,491,965	\$363,599,132	\$22,465,557	\$20,997,359

* New York Adjusted Gross Income on resident tax forms IT-100, 200, and 201.

The effective tax rate, defined as tax liability as a percentage of NYAGI, equaled 4.61 percent for all resident filers in 2000. In other words, resident filers paid an average state income tax of \$4.61 for every one hundred dollars reported in adjusted gross income.

Average effective tax rates ranged from less than zero for filers with under \$20,000 in income, to 6.19 percent for filers with income in excess of \$200,000. Filers with no state income tax liability who are eligible for refundable credits, have a negative income tax and a negative effective tax rate. Refundable credits include the earned income tax credit, the child and dependent care credit, and/or the real property tax credit among others.

Tables 3, 4, and 5 detail resident information by county. New York City data are presented first, followed by an alphabetical listing of counties excluding the five counties that represent the City of New York.

Table 3 depicts the distribution of tax returns, NYAGI, and tax by county and tax status. The type of tax form filed determines a filer's permanent place of residence. This publication defines individuals filing a resident tax form (IT-100, IT-200, or IT-201) as full-year residents. Resident tax returns that have New York State addresses but indicate no county of residence are categorized as "NYS Unclassified." Resident returns can also have out-of-state addresses. Returns in this category occur because the department accepts resident returns from part-year residents who have moved to another state during the year. Resident returns can also come from individuals who use the out-of-state addresses of their tax preparers, or use the addresses of their permanent homes or domiciles in other states while they maintain living quarters in the state for more than half a year. Resident tax returns that have out-of-state addresses but show no New York county of residence, are still classified as resident returns, but they are put in the "Residence Unknown" category.

Table 4 displays major income tax structure components: income, deductions, dependent exemptions, and tax liability by county. The table also provides this information by size of income.

Table 5 provides average income and tax liability by county. The data indicate that the distribution of income is highly variable across counties within New York for resident filers.

Part-Year Residents

Tables 9 and 10 highlight information on individuals who had income from New York sources and resided in New York for only part of 2000. Data reported by these individuals have been classified by the federal amount of New York adjusted gross income (NYAGI), as determined on form IT-203. For tax years prior to 1997, data for part-year filers were classified by only the New York source amount of NYAGI. Therefore, data users should exercise caution when comparing data from recent years with data from prior to 1997.

- In 2000, part-year resident filers represented 2.3 percent of all personal income tax filers.
- The number of filers identified as part-year residents increased by 13.4 percent to 201,672 in 2000.
- Tax liability reported by part-year residents equaled \$494 million in 2000.

OTPA uses a multi-step process for assigning tax returns to the part-year resident category. The primary selection criterion, also used for classifying full-year resident and full-year nonresident filers, is tax return type. In effect, OTPA considers only tax form IT-203 filers for the potential part-year return population. This selection method adheres to personal income tax form instructions which direct part-year filers to use the IT-203 tax form. However, the part-year population reported in this study is understated to the extent that part-year filers file resident tax returns. For example, move-ins may file a resident tax return although they are a resident for only a portion of the tax year and they have no New York income during their nonresident period. For the purposes of this report, data from these filers are included in the full-year resident tables.

After limiting the potential part-year resident populations to IT-203 form filers, OTPA computer programs review the tax forms to select the part-year tax form check-off box, permanent address, and tax mailing label address information. These data are used to cull the part-year filers from the entire IT-203 population. Unfortunately, the data presented in these fields are not always critical to the processing of the return. Part-year resident information can often be conflicting, potentially misleading and incomplete, thereby reducing the reliability of the data.

Two other factors further diminish the usefulness of these data as a tool for understanding migration trends. First, the data are not an inclusive representation of part-year resident activity occurring within the state. Part-year residents filing a resident return are identified as full-year residents. Also, the displayed information includes data only from filers with a continuing linkage to the state's income tax law. For example, individuals moving out-of-state with no income attributable to New York are not required to file a New York tax return. An additional potential complexity is the effect that length of residency has on income and tax liability data presented in the table.

* Federal source New York Adjusted Gross Income, includes non-New York income.

Data Sources

The information contained in this report comes from an examination and tabulation of selected data variables reported by filers on their 2000 New York State income tax returns. The full-year resident data were drawn from the three resident tax forms: IT-100, IT-200, and IT-201. Full-year nonresident and part-year resident filers generally file the IT-203 income tax form. A copy of each resident, nonresident, and part-year resident tax return for 2000 appears in the Appendix.

The reader should be aware that the population of New York State tax returns by place of residence for tax year 2000 differs from the population of tax returns in previous studies. The reason for this difference is that the Office of Tax Policy Analysis took eight more months to compile all of the processed tax returns because of the additional filing extension granted by the federal and New York State governments following the September 11, 2001 terrorist attacks. This year's study contains some late-filed returns and manually-handled returns that were not a part of prior year studies. Data users should be cautious when comparing data for tax year 2000 with data from previous years.

Tax Liability and Collections

The data presented in this report represent tax liability and not tax collections. Tax liability is defined as state income tax owed as reported on a New York State personal income tax return. In contrast, annual tax collections summarize all payments made under the income tax law for at least three tax return years. These payments include withholding, collections on audit assessments for current and prior year returns, settlements on current year returns (final payments and refunds), and estimated payments for subsequent year returns.
