**STATISTICAL ANALYSIS OF REAL PROPERTY CIRCUIT BREAKER
TAX CREDIT USE BY COUNTY
FINAL REPORT FOR CALENDAR YEAR 1992**

This document provides statistical information on the 517,000 households receiving real property tax circuit breaker credits as provided by Article 22 of the New York State Tax Law. The report details circuit breaker credit use in each New York State county by filer age, type of residence and income for the 1992 income tax calendar year. In addition, the tables include data on the number of IT-214 Real Property tax Credit forms filed without a personal income tax return. In effect, these IT-214 stand-alones represent households with no New York State personal income tax liability receiving a cash payment attributable to the credit.

The information in this report supersedes data originally reported in February 1994. It includes information from 135,000 late filed IT-214 tax returns sent in by clients of the New York City Human Resources Administration. We have also revised data for all counties to include information from tax forms that were processed initially with missing county identifiers.

Questions concerning these data may be addressed to:
